

What makes **EVS** RADIANT series surface mount LED unique? Instead of the industry standard 3 diode models, the RADIANT has 4 (Generation 3) diodes, allowing dual colors in one module. With 19 Flash Patterns standard (split and steady), and unparalleled brightness, the Radiant is truly one of a kind. Each surface mount unit comes with a plastic flange housing and rubber mounting gasket (pictured at right). Optional mounting brackets also available (Stack Flange, License Plate, Single and Double "L" Brackets). The one - piece fully fluted lens takes full advantage of the powerful Generation 3 LED's. The wrap around fluting provides more off axis visibility than other popular models. With a five year warranty, Brooking's **EVS** series will provide years of reliable service. A hassle free return/replacement policy will have you back up and running in no time in the rare event of malfunction.

- * (4) Generation 3 High Intensity LED's in each unit.
- * 5 year no hassle warranty
- * Available in dual or single color
- * Fully fluted lens provides excellent off axis visibility
